

Highways CCTV monitoring, done properly.

Chellan is the UK specialist in TTM CCTV monitoring. Since 2015 we've supplied Tier 1 contractors and CCTV tower companies with trained operators who watch live highway schemes around the clock from our dedicated hub in Doncaster.

24/7

Monitoring, 365 days a year

Up to 40

Cameras per operator, set by the scheme

600+

Camera capacity

Up to 50%

Saving per site against onsite monitoring

What we monitor

- **Free recovery:** breakdowns and RTCs spotted early so recovery gets moving fast.
- **Incursions:** vehicles or people entering the closure.
- **Asset damage:** signs, cones and VRS damaged or moved, logged with evidence.
- **Camera health:** every CCTV fault logged and tracked through to the fix.

LENSE, the technology behind it

Every incident is logged in LENSE, built by our sister company, giving you oversight of incident response, asset damage and free recovery.

- Live KPIs for every scheme on a client dashboard
- CCTV fault queue with a full audit trail from fault to fix
- Evidence encrypted, GDPR compliant and linked to every incident

LENSE BY CHELLAN More at lense.live

Training

We're a Lantra provider, delivering our own Highways CCTV course, TTM CCTV free recovery and incident response, in person.

The Chellan Hub

- 16 screen video wall
- 12 hour shifts, 4 on 4 off, a supervisor on every shift
- Management on call nights and weekends
- Use your preferred CCTV supplier; footage stays on a dedicated NVR
- Dedicated fibre lines, a phone line per scheme, backup power
- Add or remove schemes as your work changes

Our people

- Every operator trained and assessed on our own accredited TTM CCTV course
- Lantra TTM CCTV Operator (Major Projects) card, refreshed every 2 years
- National Highways Passports and BS7858 security cleared
- First Aid at Work for all staff, trauma trained supervisors and a 24 hour staff helpline

Let's talk about your scheme.

Monitoring, training, a LENSE demo or a visit to the hub.
